

Information on the **14th Annual Contaminated and Hazardous Waste Site Management Course - Theory, Practice & Outdoor Field Demonstrations (Site Characterization Equipment and Remediation Technologies)** Course from **May 4-8, 2009** in **Toronto, Ontario, Canada** and the course brochure can be downloaded from the **course webpage** at www.contaminatedsite.com. The course has been **filled to capacity** the past 13 years.

Please forward as appropriate to individuals (**provincial, state, local and federal government personnel, industry, consultants, stakeholders, etc.**) with interest in the learning more about **Contaminated Site Management** (see course overview below).

12th Annual

CONTAMINATED AND HAZARDOUS WASTE SITE MANAGEMENT COURSE

Theory, Practice & Outdoor Field Demonstrations

May 4-8, 2009

Toronto, Ontario, Canada

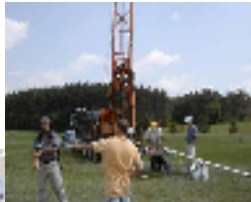

COMPARE THE CONTENT

No other course of this kind gives a greater value for the registration fee

This is the **most comprehensive one week indoor-outdoor course** being offered globally that covers all issues related to managing subsurface **contamination**, from theory to practice. The **15 instructors** in this course, along with the many technology demonstrators, will provide participants with unique access to a very broad base of practical experience and an excellent opportunity to leading professionals. This knowledge will be **hands-on approach** to understanding the tools for managing contaminated sites. Some helpful, but not necessary, as the course teaches basic principles before addressing more advanced topics.

network with coupled with a and techniques experience is

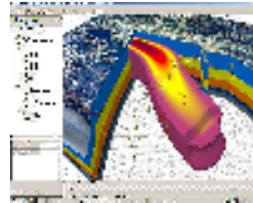

procedures, risk
remediation
contaminated

Choose either **3 or 5 days** of in-depth discussions by **15 leading environmental, soil, sediment and groundwater experts** representing **academia, consulting, and government** from across North America. These experts will provide a comprehensive and unbiased overview of hydrogeology and geochemical principles, site assessment and risk management tools, technologies, and management issues relating to and hazardous waste sites.

3 - evening hands-on workshops on computer modeling and environmental management support software. The workshops will start on the Monday night and will incorporate established and innovative computer modeling and support software used in **groundwater characterization and remediation** (Visual MODFLOW); **risk assessment** (RBCA); **environmental decision** remedial action cost engineering requirements; contaminated site management.

support;
and

1,200 page notebook and resource CD-ROM.

1 half-day of hands-on outdoor technical demonstrations on Characterization and Remediation Technologies.

4 Networking Lunches with individuals on average from over **10 countries**

4.7 Continuing Education Units (CEUs)

Optional Excursions to the **CN Tower Observation Deck** and **Niagara Falls**

Advanced registration is strongly advised. Due to the **hands-on nature** of this course (**demonstrations, workshops, and lectures**), **enrolment is limited** and applications will be accepted on a first come first served basis. There are **reduced rates** for **regulatory authorities** and members of affiliated associations worldwide. The course has been **filled to capacity the past 13 years**.

This Course provides an unparalleled synthesis of technical information and applied knowledge in contaminated and hazardous waste site management.

Below is one comment of the many comments we have received about the course.

From: Jim Gehrels

Subject: Great Course in Toronto !!

Please go to www.contaminatedsite.com to check-out the course coming-up in Toronto. This is truly a world-class course and this year it is held right in Canada! Perry Sarvas and Kip Hawley both attended and it was the best training they have ever had. This year looks even better! Feel free to call Perry or Kip if you want a participants perspective. I strongly recommend this course, especially for those who want some in-depth contaminated or hazardous waste site management training, contaminated site program or project management or risk-assessment. If you having been waiting a long time for training, I think you will be very pleased with this course.... fill-out your 15-11 form today since there is relatively little time to process your request!
